

MOHAMMAD SOHAIL SHAIKH

Software Developer

+91 8850314221 | E-mail:sohailsk0160@gmail.com | GitHub: sohailsk0160

EDUCATION

Terna Engineering College

B.E in Information Technology (Honour with AIML)

Mumbai, Maharashtra

Expected Graduation, May 2027

SUMMARY

Backend-focused developer skilled in Java, SQL, and MERN stack development. Experienced in building scalable applications, designing database systems, and handling backend logic. Strong understanding of DSA, OOP, and problem-solving with hands-on experience in team-based software projects. Dedicated to continuous learning, staying updated with the latest technologies, and contributing innovative solutions.

PROJECTS

House Rental System | Java, SQL, Swing, AWS

[Link](#)

- Designed SQL database schema and implemented CRUD operations.
- Built the desktop application interface using Java Swing.
- Integrated AWS for storing images and backups.
- Worked with a 4-member team to enhance workflow and user experience.

Yoga Pose Detection | Python, Random Forest, OpenCV, TensorFlow

[Link](#)

- Developed a pose classification model using Random Forest with strong accuracy.
- Processed pose images using OpenCV and implemented estimation pipeline with TensorFlow.
- Collaborated with a 3-member team to build an integrated demonstration interface

ACADEMIC ACHIEVEMENTS

- Recognized as 'Best Student of the Year' throughout primary school.
- Scored 95% in SSC with outstanding performance in Mathematics and Science.
- Achieved 90.24% in the final semester of Diploma in Computer Engineering.

SKILLS

- **Programming:** Java, SQL, JavaScript, Python, C, C++, PHP
- **Web:** HTML, CSS, JavaScript, React.js, Node.js
- **Databases:** MySQL, MongoDB
- **Core Strengths:** OOP, DSA (Java), REST APIs, Git & GitHub
- **Soft Skills:** Communication, Problem-Solving, Teamwork

INTERNSHIPS & TRAINING

Full Stack Development Intern | SmartED Innovations

(Mar 2025 – Jun 2025)

- Developed responsive modules using MERN stack.
- Improved performance and reduced load times through optimized code.

Android Development Intern | Heuristic Academy

(Jun 2023 – Jul 2023)

- Built Android modules using Java with database integration.
- Worked on UI/UX improvements and API handling.

Computer Hardware Intern | Salaam Bombay Foundation

(Jun 2019 – Jul 2019)

- Gained practical experience in PC assembly, troubleshooting, and maintenance.
